PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate at Raghu Engineering College with a strong foundation in data structures, algorithms, OOP, and design patterns. Hands-on experience designing, building, testing, and deploying scalable full-stack applications using Python and the MERN stack. Proven debugging skills, understanding of software engineering principles, and ability to adapt quickly in team-based development environments.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+)

Core CS Concepts: Data Structures & Algorithms, OOP, , Multithreading, Problem Solving, Debugging

Web Development: React.js, REST APIs, HTML5, CSS3, Responsive Design

Database: MongoDB

Developer Tools: Git, GitHub, Vercel, Render

WORK EXPERIENCE

Full Stack Web Development Intern — Codtech

2025

- Designed and built a production-grade MERN stack application applying OOP principles and software design patterns to ensure modular, scalable, and maintainable code.
- Engineered and tested RESTful APIs with JWT-based authentication and email verification; performed root-cause debugging across frontend and backend to eliminate performance bottlenecks.
- Worked within a structured development lifecycle — from requirement gathering and system design to deployment — using Git version-controlled workflows on cloud platforms.
- Improved application stability through systematic code reviews, error handling, and iterative performance optimisation across client and server components.

AWS AI/ML Intern — Eduskills

2025

- Built and deployed Python-based machine learning models using AWS SageMaker, EC2, S3, and IAM; applied structured problem-solving and feature engineering for real-world prediction tasks.
- Designed scalable ML pipelines with attention to model accuracy, evaluation metrics, and reproducibility; collaborated on cloud-based workflow configuration and access management.

PROJECTS

Expense Tracker Web Application — MERN Stack

2026

- Architected a full-stack expense management system with secure authentication, real-time Chart.js data visualisation, and responsive UI — emphasising application stability, code reusability, and clean API design.
- Designed Express.js and MongoDB backend with optimised queries and robust error handling; wrote modular, testable code ensuring consistent behaviour across edge cases.

Interactive To-Do List Application

- Developed a task management app with full CRUD functionality, drag-and-drop UI, and local storage persistence using event-driven JavaScript and OOP design principles.

EDUCATION

B.Tech in Computer Science — Raghu Engineering College

2023 – Present

GPA: 7.5/10 (75%)

Diploma in ECE — Sai Ganapathi Polytechnic

2020 – 2023

Aggregate: 76%

CERTIFICATIONS

AWS AI/ML Virtual Internship Certificate — Eduskills (AICTE Approved)

2025

Full Stack Web Development Internship Certificate — Codtech

2025

Data Science Internship Certificate — SkillDzire

2025

Java And Python Certificate — NPTEL

2025

ADDITIONAL

- Competitive Coding: Actively solving Data Structures & Algorithms problems — covering arrays, linked lists, trees, graphs, dynamic programming, and recursion.
- Relevant Coursework: Operating Systems, Computer Networks, Database Management Systems, Software Engineering, Object-Oriented Analysis & Design.
